## Outfit 1

### Black but Bright

Design : As a designer, my favourite colour is Black and it's always Black since I was a child. Some might say that Black colour is so sad, dark or made your day moody. Then I need to help my favorite "Black".

So, I did this design for "my everyday pants". Firstly first, I want the width of legs part wider than average also I design the hips and waist part not to be "chubby looks" when you wear. I finishing this design by adding a rubber band on the backside, so don't worry if you gain your waist size a little bit.

## Outfit 2

### One skirt fits all

Design : We know how you feel about your "too small to wear anymore" Then turns out you're going to buy a new one even if you just brought it two weeks ago. So, we choose to add an elastic on the backside to make more room for your waist just in case you are gaining a little bit or even more.

Our skirts made from Linen and we choose to keep it colours as it ways, a natural colours, also add some detail buttons all the way down from waist to toes but it's only mock up buttons style so you don't need to button them all because we attached them for you already.

## Outfit 3

### Street or Sweet

Design : We believe in "outfit could change your emotional" So we design this Dress and Tunic style for you to playing with. Adding a pant as a layer for a Street looks or wearing this solo for a sweetness looks, it's up to your moods.

## Outfit 4

### Weekdays or Weekends

Design : we make this dress for you who really love to wear natural material such as Linen. No matter it's weekdays or weekends, this dress will be your best friends.

A rope is for your weekdays and formal looks makes you feel elegant at works while without a rope will makes you feel casual and comfortable when you going out on a date or weekends.
